

Crystal Clouds

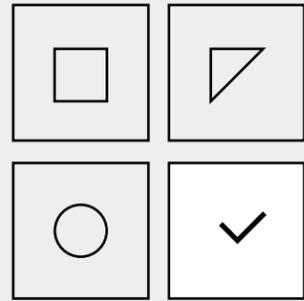

The Crystal Cloud plays on the various shapes that the eye can see from crystals gathered in clusters. Beyond providing visual interest, the “facets” of the cloud redirect sound waves to create better sound diffusion within the room.

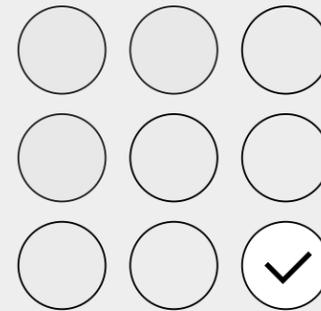

This is what makes Crystal Cloud a multifaceted solution that can transform the sound and the look of a space.

Product Care

Handling & Storage

Handle products with care so as to avoid folding the polyester felt, chipping its edges, or indenting its faces. Store products in their original containers in a well-ventilated area until the intended application environment is ready for installation. Allow products to acclimatize to environmental conditions. Lay them flat on their faces; do not stand them on their edges. Protect from moisture, heat, direct sunlight, and the elements.

Warranty

AKUSTUS warrants the construction and finish of all our products to be free from defects in material and workmanship for a period of 1 year from the date of purchase.
