

Suspended Products

INSTALLATION OVERVIEW

SUSPENDED PRODUCTS INSTALLATION OVERVIEW

INTRODUCTION

This installation document provides an overview of methods and general instructions meant to aid the installer in applying AKUSTUS products. Installers must rely on their professional experience and their assessment of the project environment to ensure a successful installation.

Upon delivery, examine the products for any damage that may have been caused in transit. If there are any issues, please contact your local distributor immediately. Claims will not be accepted after installation has begun.

HANDLING & STORAGE

Handle products to avoid folding the product, chipping the edges of the product or indenting the faces of the product. Store products in original containers in a well-ventilated area until the intended application environment is ready for installation. Allow products to acclimatize to environmental conditions. Lay products flat on their faces; do not stand products on their edges. Protect from moisture, heat, direct sunlight and the elements.

CLEANING

Lightly brush or gently vacuum to remove dust. Clean with warm water and mild, non-toxic soap to remove spills. Test solution on an inconspicuous spot before applying to more visible areas. Blot with a dry cloth after applications of the solution to avoid saturating the material. Avoid applying too much pressure when cleaning the products.

SUSPENSION METHODS

Note: Not all installation methods are applicable to all products; please refer to product sheets and feel free to contact us for product-specific details.

Cable gripper with aircraft cable

Eye bolt

Premium cable gripper with aircraft cable

T-bar clip with threaded stud

Threaded rod

SUSPENDED PRODUCTS INSTALLATION OVERVIEW

OPTIONAL SUSPENSION ACCESSORY

Multi-way suspension kit with aircraft cable

CEILING ATTACHMENT METHODS
